Feature of product

Ethylene Propylene Rubber is used for our check valve. It is non-toxic, flexible and heat-resistant.

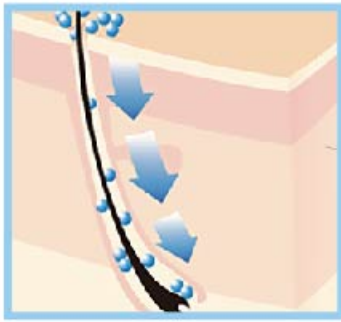

The material remains steady between the temperatures of $-100^{\circ}\text{C} \sim 250^{\circ}\text{C}$. It has excellent water resistance, chemical resistance and anti-oxidation.

* Originated check valve that prevents water from counter flowing.

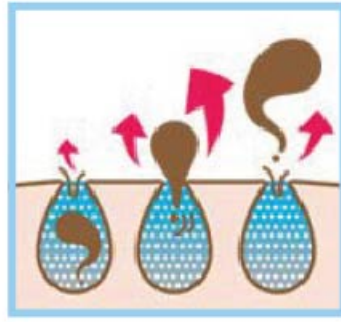

* Venturi tube designed check valve (Patented).

Feature of product

Increase hair growth

Wrap the dirt

ECO

Deep clean
skin pores

Anion health

Save Water

* Water can be mixed with gas through special valve to produce anions so that this can improve blood circulation and make the skin smooth when you taking a shower.

* Water can combine with gas and will have high clean function.

* This can reduce water usage to save water resources. This is eco-friendly without energy consumption to reduce labor costs.

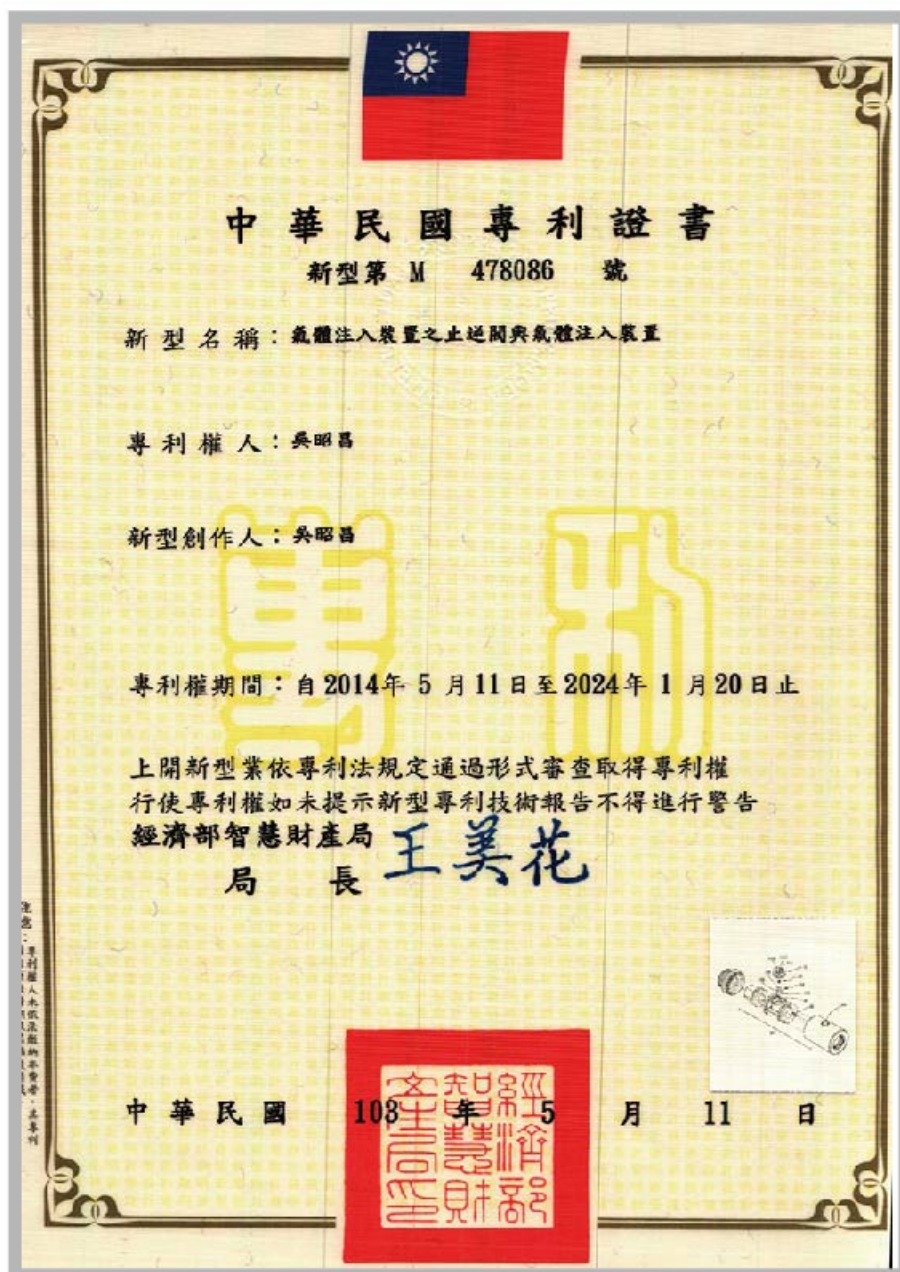

* Water can combine with gas, this can help release fatigue, pressure and improve blood circulation and boost your skin's oxygen levels.

* Easy to install because of the small size.

* Water can be mixed with gas through special valve to produce anions can deep clean skin pores, increase hair growth and boost your metabolism.

Certificate

Just simply install in between bath faucet and shower hose and then attach to hand shower can produce anions to help deep clean skin pores, easily bring away the dirt and also release fatigue, pressure. But even more importantly is to meet the environmental protection.
